Minh Nguyen

Lead Product Designer · products for money, data and trust

Ho Chi Minh City · open to remote across APAC · xpland.nguyen@gmail.com · minhdesign.xyz

SUMMARY

Ten years in product design, after four as a front-end developer. I design products people have to trust with their money, data or security, and I lead by writing the standard down and coaching people against it. Two of my releases are measured in production; the rest of my numbers say how they were measured.

EXPERIENCE

Senior Product Designer · National Australia Bank, Ho Chi Minh City

Feb 2024 - now

- Corporate & Institutional Banking (May 2025 – now). UX owner for credit submissions. Led the design of straight-through processing (Jan–Jun 2026, live since mid-2026), which moved the hand-off of approved facilities from email into the credit platform. In testing with 6 bankers it took about 5 minutes instead of up to a day; ExQual 4.40, Gold against a Silver target.
- Redesigned the single large exposure check: 67% fewer clicks to review and 39% fewer to simulate a change, ExQual 4.57 / 5 in five moderated sessions against a Silver target.
- Sole designer on RegShield, an AI-assisted tool for trade-reporting breaks across four regulators. Rebuilt an inherited prototype around the operator's day: the same 8 people scored the old tools 3.2 and the rebuild 4.6 on ExQual, Platinum against a Bronze target. In build, not live. 23 decisions logged from 27 working sessions.
- Merchant Services (Feb 2024 – Apr 2025). Led the onboarding redesign across two channels and three products. Time to apply fell from 21–25 minutes to about 10 in testing (n=10), SUS 80.7, and dropout fell by a relative 20% after Phase 1. Mentored two designers.
- AI adoption lead for the Vietnam design chapter since March 2026. Q2 FY26 individual award; Q3 FY26 individual award for straight-through processing. Winner, Design Day Challenge 3.

Ask about Minh

Lead Product Designer (contract) · Unera, consumer stablecoin wallet and issuer platform

Dec 2025 - now

- Hired as a UI/UX designer and promoted to lead. Lead design for the Huma wallet (43 responsive web pages), the hUSD issuer portal and the operator console. Responsive web; a native app is planned, not built.
- Built and maintain two token-based design systems. Work with a part-time junior designer on error and edge states.
- Prototype in code with AI tools and verify against the product spec: 99 of 99 automated checks passing on the donation flow.

UI Designer · Refinitiv Labs, London Stock Exchange Group, Singapore

Jan 2021 - May 2022

- Ran the UX for PC Intelligent end to end: SUS 70 → 89 in testing with 9 users.
- Designed FX Impact Intelligence for Eikon. Built a 52-colour palette for colour-blind users, adopted across Labs products.

Senior Product Designer · Hearti Lab, Singapore May 2018 - Oct 2020

- Hired and led three designers. Launched 3 products and delivered 15 projects in two years.
- Designed CYBERhythm, a cloud-security dashboard.

Product Designer, UX/UI Designer · Green Koncepts and EGIDE, Singapore

2016 - 2018

- Energy-management platforms for 65 clients in four ASEAN countries.

Front-end developer and UI designer · Singapore 2012 - 2016

- Built and shipped production web apps in HTML, CSS and JavaScript.

LEADERSHIP AND TEACHING

- ADPList mentor since 2022: 250+ sessions, 50+ designers
- Wrote and ran an 8-week product design course, two cohorts
- Host, NAB design chapter catch-ups, 4.53 / 5 average
- President, EVO Toastmasters; members 7 → 20
