Minh Nguyen

Lead Product Designer · products for money, data and trust

Ho Chi Minh City · open to remote across APAC · xpland.nguyen@gmail.com · minhdesign.xyz

SUMMARY

Ten years in product design, after four as a front-end developer. I design products people have to trust with their money, data or security, and I lead by writing the standard down and coaching people against it. Two of my releases are measured in production; the rest of my numbers say how they were measured.

EXPERIENCE

Senior Product Designer · National Australia Bank, Ho Chi Minh City
Feb 2024 – now

- Corporate & Institutional Banking (May 2025 – now). Design lead for straight-through processing (Jan–Jun 2026, live since mid-2026), which moved the hand-off of approved facilities from email into the credit platform. In testing with 6 bankers it took about 5 minutes instead of up to a day; ExQual 4.40 from 8 people, Gold against a Silver target.
- Redesigned the single large exposure check, live since August 2025: 67% fewer clicks to review and 39% fewer to simulate a change, ExQual 4.57 / 5 in five moderated sessions against a Silver target. A month after launch the bank's "establishing relationship" score reached 70 out of 100 for the first time, up from 68; other work feeds that score too. Coached a second designer, Ariel.
- Sole designer on RegShield, an AI-assisted tool for trade-reporting breaks, starting with the US regulator. Rebuilt an inherited prototype around the operator's day: the same 8 people scored the old tools 3.2 and the rebuild 4.6 on ExQual, Platinum against a Bronze target. In build, not live. 23 decisions logged from 27 working sessions.
- Merchant Services (May 2024 – May 2025). Led the onboarding redesign across two channels and three products. Time to apply fell from 21–25 minutes to about 10 in testing (n=10), SUS 80.7, and dropout fell by a relative 20% after Phase 1. Mentored a designer, Ami, on audits, testing and synthesis.
- AI adoption lead for the Vietnam design chapter since March 2026. Q2 FY26 individual award; Q3 FY26 individual award for straight-through processing. Winner, Design Day Challenge 3.

Lead Product Designer (contract) · Unera, consumer stablecoin wallet and issuer platform

Dec 2025 - now

- Hired as a UI/UX designer and promoted to Lead Product Designer. Led design for the Huma wallet (43 responsive web pages), the hUSD issuer portal and the operator console, all complete and not launched yet. Responsive web; a native app is planned, not built.
- Built two token-based design systems. From June 2026, led a part-time junior designer who drew the error and edge states for all three products.
- Prototype in code with AI tools and audit the build against the product spec, line by line.

UI Designer · Refinitiv Labs, London Stock Exchange Group, Singapore

Jan 2021 - May 2022

- Ran the UX for PC Intelligent end to end: SUS 89 against a 71–76 target and adoption interest 4.6 / 5 in testing.
- Designed FX Impact Intelligence for Eikon. Built a 52-colour palette for colour-blind users, adopted across Labs products.

Senior Product Designer · Hearti Lab, Singapore May 2018 - Oct 2020

- Hired and led two designers. Launched 3 products and delivered 15 projects in two years.
- Designed CYBERhythm, a cloud-security dashboard.

Product Designer, UX/UI Designer · Green Koncepts and EGIDE, Singapore

2016 - 2018

- Energy-management platforms for 65 clients in four ASEAN countries.

Front-end developer and UI designer · Singapore 2012 - 2016

- Built and shipped production web apps in HTML, CSS and JavaScript.

LEADERSHIP AND TEACHING

- ADPList mentor since 2022: 250+ sessions, 50+ designers
- Wrote and ran an 8-week product design course, two cohorts
- Host, NAB design chapter catch-ups, 4.53 / 5 average
- President, EVO Toastmasters; members 7 → 20
